

## ENVIRONMENTAL INFORMATION

To guarantee sustainable business development that is respectful of the environment, AB Building Products currently has the following green certificates:

**Environmental Product Declaration (DAP) / Environmental Product Declaration (EPD)** : Valid until January 2028, the DAP/EPD is a type III ecolabel that analyzes the life cycle in a transparent and verifiable way by a third party. In this case, this ecolabel is for all the manufactured extruded product.

**ISO 14001 environmental management system certification:**

The ISO14001 standard is a management system that helps to control, reduce and even eliminate the impacts on the environment produced by the organization's activities.

**Eco-labels % Recycling:** There are several self-declarations of the % in recycling that have our products.

**Designed to Disassemble Ecolabel:** Available for Exadeck

Other actions that we have carried out that contribute to the environment are:

**Carbon Footprint:** *REGISTRATION CERTIFICATE\_2019\_C*. This carbon footprint quantifies the greenhouse gas (GHG) emissions. Its objective is to identify the emission sources in order to monitor and implement actions to reduce their impact.

**Installation of photovoltaic panels:** They provide clean and renewable electrical energy for the self consumption.

**Installation of a treatment plant:** It allows us to reuse all the water generated in the cleaning processes, thus significantly reducing both the management of wastewater and the consumption of groundwater.

In addition to all these voluntary actions, the organization complies with current applicable environmental legislation:

AB Building Products Ltd., Unit 18 Smeaton Road, West Portway, Andover, Hampshire SP10 3LF, United Kingdom
