

PRODUCT

EXTRUDED PORCELAIN STONEWARE, ACCORDING TO UNE-EN 14411, GROUP A1a, EXADECK SERIES

MINIMAL RECYCLED CONTENT

The content of recycled material has been calculated following an internal method based on the UNE-EN ISO 14021 standard and using the information from the production batch of the Exadeck format for the month of June 2022.

For 1000kg of ceramic product:

- Total water content (kg)	280
- Total solids content (kg)	1320
- New water content (kg)	16
- Recycled residual water content (kg)	264
- Virgin solid matter content (kg)	921
- Recycled solid matter content (kg)	399

41%

The composition for the manufacture of products Referenced ceramics contain at least 41% pre-consumer recycled material, including residual water and internally sourced recycled solid matter.
