Introducing New Improved System 15

- Easy Squeeze Trigger Applicator
- Improved T-strap Cradle
- Trigger Auto-snaps into Locked Position

IMPROVED!
easier to use
APPLICATOR

Set-up instructions on the outer carton assist with proper operation. Cold weather reminder is prominently displayed.

Detailed Operating Instructions are immediately available when removing the rear access panel. These instructions have been updated to be consistent with all communications regarding the use and storage of polyurethane spray foam.

Trigger automatically goes into the OFF position upon removal from packaging. Prevents accidental spraying during setup.

New T-strap cradle ensures consistent activation of product and even dispensing of chemicals.

New squeeze-trigger applicator is easy to operate and provides excellent metering from low to high output. Automatic shutoff upon trigger release.
