

PENOSIL

EasySpray

SPRAYABLE FOAM

PENOSIL EasySpray is a unique sprayable foam for fragment insulation and insulating uneven surfaces.

- ✓ Good thermal insulation properties
- ✓ Reduces cold bridges
- ✓ Prevents condensation on cold surfaces
- ✓ The spray applicator is suitable for most foam guns.

Application temperature: +10...+30 °C

1000 ml aerosol can, content 700 ml

Colour:

Why to use PENOSIL EasySpray sprayable foam?

Instead of traditional insulation boards and fasteners, insulation can be conveniently made on site with the help of spray foam. The foam recipe has been especially developed for thermal insulation. Allows uneven and hard-to-reach places to be insulated quickly and easily. When it is applied to the building envelope, it creates an efficient wind and moisture shield.

Why is the PENOSIL EasySpray spray nozzle so unique?

With the spray nozzle it is possible to adjust the thickness and width of the insulation layer. The further away you spray, the larger the area that can be covered. Optimum distance is 40 cm from the surface.

The nozzle can be used in a vertical or horizontal position. The foam expands 100%. The next layer can be applied in 60 minutes. The number of layers is unlimited.

Application areas

- Insulation of attics, balconies, garages, basements, pipes, tanks, etc.
- Insulation of parts of the structure sensitive to cold bridges, including doors, lintels, ceilings.
- Fragment insulation and repair work.
